Erratum

Erratum to "Advanced computational reasoning based on the NKRL conceptual model" [Expert Syst. Appl. 40 (8) (2013) 2872–2888]

Gian Piero Zarri *

Sorbonne University, LaLIC/STIH Laboratory, Maison de la Recherche, 28 rue Serpente, 75006 Paris, France

Only the most evident errors have been signaled in the paragraphs below. The Publisher regrets the mistakes made.

– Page 2875, column 1, line 14 from the top of the column: "SUBJ(ect), OBJ(ect) and BEN(e) F(iciary)": SUBJ, OBJ, BEN, F must be set in Arial. Moreover, there is no blank between "(e)" and "F" in "BEN(e)F(iciary)". The full expression must then appear in print as: "SUBJ(ect), OBJ(ect) and BEN(e)F(iciary)".

– Page 2877, second column after Table 1, line 5 from the top of the column: in "SUBJ(ect)", "SUBJ" must be in Arial.

– Page 2878, Table 2 (second column): line 11: in the expression "AUXILIARY_GREASING_PUMP_M202: (RUNNING_)", "running_" must be in lower case letters. At the bottom of the Table, "virt2.c30 (GOAL virt2.c32 virt2.c33)" must be set on the same line; moreover, all these terms must be in Arial.

– Page 2879, first column, Section 3.5. "Semantic" and "functional" roles, second paragraph of this Section: "john_" in line 15 must be in Arial upper case (i.e., "JOHN_") as in the previous line, and "student_1" in line 17 must be in Arial upper case, i.e., "STUDENT_1".

– Page 2879, first line of the second column: "date-2" must be in Arial lower case, i.e., "date-2", as the previous "date-1".

– Page 2880, Note 3: the introductory paragraph of this note has been improperly merged with the first bullet line. The upper part of the note must then be read in the following way:

The ordered sequence of the matching operations between a pattern p_i and a target occurrence c_j (ignoring the temporal data) is then the following:

- Check if the predicate is *the same* in p_i and c_j. If not, *the match fails*.
- Check if the list of all the modulators etc.

– Page 2881, third "normal" paragraph after the four bulleted paragraph, in the second line "*being*" must be in Arial lower case roman, i.e., "*var2* = human_being".

– Page 2882, Table 4 (1st column): in the formal expression "**candidate predicative occurrence** c_j **to be tested:**", "amount_" in line 4 must be in Arial lower case, i.e., "amount_ 64,000,000))", with a blank space before "64,000,000".
